

## Historical Point-to-Point Returns of TriVysta Indices Since Inception

One of the great features of the TriVysta™ Fixed Indexed Annuity is the ability to diversify across all of the index strategy options.

TriVysta provides opportunities to enjoy the positives of market indexes, while mitigating the risk of declining markets.

The great power of diversifying gives you the opportunity to grow your assets and build income for the future. Flexibility of three indexes, the guarantee of a fixed account, and growing income potential provides diversification and peace of mind.

\*Returns are based on actual index performance from 5/1/2016 - 11/1/2017. All cap, spread, and participation rates used are what was offered at that specific time in the TriVysta® Fixed Indexed Annuity. This is not a guarantee or prediction of what future returns may be available in the index strategy options.

The selection of one or more of the indices as a creditor option under the Product does not obligate GLAC or Deutsche Bank AG to invest annuity payments in the components of any of the indices. The CROCI Indices have been built on the premise that the CROCI Economic P/E is an effective indicator of inherent value. This premise may not be correct, and prospective investors must form their own view of the CROCI methodology and evaluate whether CROCI is appropriate for them. While volatility controls may result in less fluctuation in rates of return as compared to indices without volatility controls, they may also reduce the overall rate of return as compared to products not subject to volatility controls. Please see the Product Summary and Annuity Illustration for more information about the Indices and the Product.
